PROLiNK PRO775CA CRT MONITOR PG 24

Prolink Pro775CA CRT Monitor

With a full 17 inch viewable screen, the Prolink Pro775CA features two technologies; the auto-scale which gives full screen display and the auto-adjustment which self adjusts the screen settings for optimal display. It has a maximum display resolution of 1600 x 1200 dpi in pure flat mode and 1280 x 1024 dpi in normal mode. Dot pitch is 0.25 mm for pure flat and 0.28 mm for normal display. The Pro775CA CRT monitor is also incorporated with anti-glare and anti-static technologies. It has 22 OSD (On Screen Display) controls which lets the users adjust to their desired viewing preference. Connectivity option is via an analog port and its nett weight is 16kg.
