FOR IMMEDIATE RELEASE

## PROLiNK TFT LCD Displays

Superior Graphic Quality & Great Performance for Gaming, Design or Office Usage

[Singapore, June 2005] FIDA International (S) Pte Ltd (FIDA) launched PRO150, 170 and 190 series of 15-, 17- and 19-inch TFT LCD monitors.

These LCD monitors are equipped with super fast response time of around 12ms. Gone are the blurry moving images making PRO Series the choice displays for gamers. Not only does

PRO Series have a fast response time, its high contrast ratios of 350:1, 500:1, and 600:1 for 15, 17 and 19-inch monitors respectively boast a higher average compared with other LCD monitors that are available in the market.

The PRO Series also has very good resolution of 1024 x 768 for 15-inch, 1280 x 1024 for 17- and 19-inch. The interpolation is much better than that of its competitors. This means that the graphics will still be clear even if the monitor is set at a reduced resolution. This would be handy for gamers who use 3D cards.

PRO170 Series brightness levels at 300 cd/m<sup>2</sup>, which vaults number 1 in its league.

The image quality, contrast and brightness are all perfect for graphics work. Text is crisp and the colors are perfectly balanced especially with the DVI input for PRO173A and PRO193A. These monitors come with very good preset for the DVI input connection and the display quality is excellent.

All PRO Series comply with VESA Hanging Style Standard and may be mounted on walls for functionality or aesthetics.

### Specs

| Specs / Model  | PRO150 Series        | PRO170 Series              | PRO190 Series              |
|----------------|----------------------|----------------------------|----------------------------|
| Resolution     | 1024 x 768           | 1280 x 1024                | 1280 x 1024                |
| Contrast Ratio | 350:1                | 500:1                      | 600:1                      |
| Response Time  | 5/11ms               | 4/12ms                     | 2/10ms                     |
