

Easily Create Or Expand Your Ethernet Network!

8th September 2005 – PROLiNK's PSW160 BUS Master fast Ethernet Adaptor switch comes with (16) 10/100Mbps ports is a solution for the small business looking to expand network connectivity at an affordable price. The PSW160 combines ease of use, with unsurpassed performance for an exceptional value.

Ease of Use

The PSW160 is truly a Plug-&-Play switch, with features like:

- Auto Negotiation (Full or Half Duplex) - Whether you are running at Half- or in Full Duplex, the Switch automatically negotiates and runs the highest supported transmission rate.
- Auto MDI/MDIX Crossover - All ports support auto-negotiating MDI/MDIX detection, which eliminates the need for crossover cables or uplink ports. Every port can be connected to another switch or PC Station.
- Built-in 8K entry MAC address lookup table plus 64-entry CAM to eliminate hash collision problems

The PSW160 is the perfect choice for Plug-&-Play support for 10BASE-T and 100BASE-TX networks.

Wire-speed Performance

The psw160 features a non-blocking wire-speed forwarding and filtering architecture, with a 3.2Gbps switching capacity, for maximum data throughput. All ports also support Speed, Duplex and 802.3x flow control ability auto-negotiation, supports up to 32 VLAN groups for port-based VLAN and 802.1Q tag VLAN.

More detailed information on PSW160 specifications can be found via www.fida.com

PROLiNK PSW160 will be available at all local and overseas-authorized PROLiNK dealers and distributors around end of September.
